DETAILED ACTION

Double Patenting

1. Claims 81-87, 101, 102, 104, 111-114, 119 and 120 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 41 of copending Application No. 10/664342. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasons of record.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

2. Claims 90-98, 106, 107, 109, 115-118, 121 and 122 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 41 of copending Application No. 10/664342 in view of Nissing et al ('834). Applicant's arguments have been considered but are not deemed persuasive for the reasons of record.

This is a provisional obviousness-type double patenting rejection.

3. The terminal disclaimer filed on 8/8/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,649,262 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

4. Claims 88, 89, 99 and 100 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject

matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no original disclosure directed to a peel force between the wipes in the roll in the claimed amounts. The original disclosure is directed to an amount of "at least about 100 grams" for peel force between wipes.

5. Claims 111 and 112 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. An inconsistency exists between these claims and the claims upon which they depend. The term "about 1" in claims 111 and 112 is broader in scope than the claim upon which they depend. Correction is required.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 81-89, 111-114, 119 and 120 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' acknowledged state of the art in view of Gordon et al 5,763,332. The primary reference discloses the invention substantially as claimed, namely a roll of wet wipes with perforated sheets; see page 1, lines 24-28 of the instant specification. The secondary reference discloses the desirability of the use of a sodium

Art Unit: 1772

chloride containing composition on wet wipes; see Example III. It would have been obvious to one of ordinary skill in the art to use the antibacterial composition of the secondary reference on the article of the primary reference to provide a wet wipe with enhanced cleaning properties. Regarding the size of the roll, it would have been obvious to one of ordinary skill in the art to adjust the size of the wet wipes to accommodate a particular end use of the wipe. It would have been obvious to one of ordinary skill in the art to vary the peel force between the wipes to any specific amount to provide the desired peel properties for a particular end use.

2. Claims 90-100, 115-118, 121 and 122 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' acknowledged state of the art in view of Gordon et al 5,763,332 as applied to claims 81-89, 111-114, 119 and 120 above, and further in view of Nissing et al. Nissing et al disclose the desirability of providing transverse grooves in wet wipe material to aid in cleaning surfaces; see column 1, lines 21-33 and Figure 5b. It would have been obvious to one of ordinary skill in the art to provide grooves in the wet wipe of the prior art article in order to increase its ability to clean surfaces.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1772

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
